PROFESSIONAL SUMMARY

Highly motivated and results-oriented final-year student pursuing a Bachelor of Electrical Engineering Technology (Robotics and Automation Technology). Proven hands-on ability in robotics programming, PLC automation, and production line optimization, gained through industrial experience at Micron Memory and ViTrox. Committed to leveraging technical expertise and practical experience to drive innovation and value within a forward-thinking engineering organization. **Available for industrial internship placement, January 2027 intake.**

TECHNICAL SKILLS

Automation and Control: PLC Programming (Omron), Pneumatic Systems, Robot Axis Teaching, Drive and Actuator Systems, Automated Guided Systems, Vision Systems
Programming and Software: MATLAB, HTML, FreeCAD, pgAdmin, XAMPP, Google AppSheet (No-Code), Gemini AI
Hardware and Tools: Microcontrollers (Arduino), Electrical Wiring, Machine Maintenance and Troubleshooting
Languages: Malay (Fluent), English (Intermediate)

EDUCATION

Bachelor of Electrical Engineering Technology (Robotics and Automation Technology) with Honours
Universiti Malaysia Perlis (UniMAP), Ulu Pauh, Perlis | October 2023 - Present
- Relevant Coursework: Networking Automation, Mechanical and Machine Design, Drive and Actuator Systems, Microcontroller, Automated Guided System, Vision System.

Diploma in Mechatronic Technology (DKM Level 4)
Japan Malaysian Technical Institute (JMTI), Bukit Minyak, Penang | July 2020 - July 2022
- CGPA: 3.11. Relevant Coursework: Pneumatic Systems, PLC Programming (Omron), Project Management, Occupational Safety and Health.

Sijil Teknologi Perindustrian Mekatronik (SKM Level 3)
Institut Latihan Perindustrian (ILP), Kangar, Perlis | January 2019 - January 2020
- CGPA: 3.47. Relevant Coursework: PLC Programming (Omron), Basic Electrical Wiring.

PROJECTS

AUREWAS & AI-REWAS - AI-Powered PLC-Based Automated Recyclable Waste Segregation System
Final Year Project 1 & 2 | Universiti Malaysia Perlis | In Progress
- Developed as a real case study for waste management handling in Perlis, proposed to SWCorp Perlis.
- Designed and built the complete automation flow using Omron PLC programming, integrating sensors and actuators for reliable, real-time operation from waste entry through to final sorting.
- Upgraded item detection from sensor-based to camera-based AI vision (AI-REWAS), enabling the system to visually identify and classify recyclable items.
- Integrating the AI vision output with the existing Omron PLC control system, improving sorting efficiency and adding safety features through intelligent, real-time segregation.

Galeri Warisan Maya - VR Virtual Museum Tour
Team Leader | DICE 4.0, UniSZA (AR/VR Category) | 16 - 19 November 2026
- Led a team of 4 members, guided by 1 mentor, to develop a virtual heritage gallery for the AR/VR category.
- Developed an immersive virtual museum tour using a VR headset, transforming local heritage (warisan) into digital learning.
- Collaborated with FCOEE and MAIPS Perlis to turn heritage content into a VR world for education.

UniParcel - Residential College Parcel Tracking ID System
Team Member | Gemini No-Code Hackathon 2026 (KPT and Google for Education) | October - November 2026
- Co-developed a no-code parcel management system for UniMAP residential colleges within a 3-member team.
- Designed the unique Parcel ID and tracking workflow using Google AppSheet, Google Sheets and Gemini AI.
- Addressed 19 parcel counter issues, including inaccurate parcel status, wrong-branch deliveries and tracking-number errors.

Stock Take Monitoring System (Design Project)
Programmer | October 2025
- Developed a real-time stock take monitoring system for a real industry case: Kimie Z Ayam Goreng warehouse.
- Monitored remaining chicken stock levels and calculated required supplier order quantities to prevent over-ordering.
- Designed and created the database implementing a FIFO (First-In, First-Out) inventory system using pgAdmin.
- Developed the system interface using XAMPP on an independent, self-hosted localhost server.
- Collaborated effectively within a 4-person team to successfully deliver the system.

WORK EXPERIENCE

Technician
Micron Memory Sdn Bhd, Batu Kawan, Penang | July 2022 - October 2023
- Executed preventative and corrective maintenance on 21 production line machines, resulting in a quantifiable reduction in rejected products and improved output quality.

- Directed 30 operators and assisted 10 shift technicians, ensuring all machinery operated at peak efficiency and production schedules were met ahead of target.
- Analyzed production data during peak seasons to identify process bottlenecks and implemented machine conversion protocols to rapidly adapt to varying customer order specifications.

Technical Intern

ViTrox Sdn Bhd, Batu Kawan, Penang | *January 2021 - June 2022*

- Executed precision assembly, measurement, and maintenance of machine components, utilizing specialized tools to ensure product quality prior to customer delivery.
- Mentored and assisted the team leader in onboarding new interns, ensuring all tasks adhered to company specifications and were completed ahead of schedule.

Freelance Delivery Partner

Grab, Perlis / Kedah / Penang | *2020 - Present*

- Managed personal logistics and optimized delivery routes to consistently ensure timely and secure deliveries.
- Demonstrated strong time management and organizational skills in a dynamic, high-volume, self-regulated environment.

LEADERSHIP AND EXTRACURRICULAR

President, MYSTEM Ambassador Club UniMAP | *2025/2026 Session*

- Spearheaded the planning and execution of all STEM-related programs, engaging diverse groups of participants both on and off campus.
- Directed and mentored a committee of 17 members across all club activities.

Program Director, Duta PayNet Go Cashless, CGEE UniMAP | *10 October - 30 December 2026*

- Directing the UniMAP Cashless Ecosystem 360 program, targeting 10,000+ digital transactions, 2,000+ registered students and 40+ active vendors.
- Led the restructuring and appointment of student ambassadors into data, media and campus zone teams for vendor onboarding, Go Cashless booths and payment-safety literacy sessions.

Program Director, SULAM 2026 - Technologies in Society | *December 2026*

- Restructured the entire program flow for a Service-Learning Malaysia (SULAM) community program.
- Directed the program to bring STEM into the local community through hands-on, technology-based activities.

Lead Executive Committee (Exco) for Career, UNICESS Club UniMAP @ CGEE UniMAP | *2026/2027 Session*

- Handled all career talks and career-related events across UniMAP.
- Collaborated with NGOs, SMEs, and MNCs to give students exposure to their businesses and industry practices.

Lead Executive Committee (Exco) for STEM, Student Representative of Electrical Engineering and Technology (SREET), FKTE UniMAP | *October 2025 - Present*

- Coordinated and organized key faculty-level STEM events and student engagement activities.

Trainer and Facilitator, AIRED Junior FCOEE | *January 2025 - January 2027*

- Organized and facilitated the AIRED Junior program, engaging 70 participants from 10 elementary and secondary schools.
- Managed a logistics and promotions team of 10 Executive Committee members for various university-level outreach events.

PROJECT AND ACTIVITY INVOLVEMENT (2026)

National Career Industrial Summit (NCIS), UniMAP | 2026

- Project Manager for the 'Empowering the Next Generation of Leadership' slot, handling 560 students in one hall with discipline.
- Managed and briefed the full crew on delivering their individual job scopes.

Electrical Mechatronic Design Innovation Expo (EMDIEX), UniMAP | 2026

- Presented the Stock Take Monitoring System to industry, demonstrating the solution to the Kimie Z Ayam Goreng warehouse problem statement.

School Outreach, SK Batu Bertangkup, Perlis (2026): Delivered an inspirational STEM session promoting UniMAP courses, created interactive learning games, and served as a role model for students.

Perlis International Marathon (2026): Supported local and international participants with race briefings; assisted KBS officers and Mount Venture in route monitoring.

Jaguh Keusahawanan National, UUM (2026): INSKEN Malaysia entrepreneurship bootcamp; presented an engineering product for commercialization and defended a full business proposal.

STEMAGIKA, UPSI (2026): MYSTEM collaboration with Kolej Mahasiswa Ungku Omar UPSI; operated an educational game booth and performed as a stage presenter.
